Modification Description

BCOPL (on behalf the joint venture participants) is seeking a modification to SSD 09_0182 under Section 4.55(2) of the EP&A Act to facilitate the natural progression of mining operations at BCM towards the north-west beyond the currently approved Mine Disturbance Boundary and within the existing Project Boundary, CL368 and ML1883 (with no disturbance to the vegetation corridor). MOD 10 proposes the recovery of a further 30 Mt ROM coal and increase life by four years until the end of 2040.

How is the modification substantially the same as the original development?

- Mining operations to recover additional coal resource from the same coal seams using the approved methods and production, processing and transportation rates within the existing Project Boundary and mining authorities, albeit for a further four years.
- No significant additional environmental impacts have been identified that would result in substantial changes to the BCM as was originally and/or is currently approved.

See Section 4.3.1 of the Modification Report for further information.
